Support Options

Please choose one of the following support options:

FAQ

This area lists the most Frequently Asked Questions arising from the usage of CMMS.

Forum

This area is set aside to give registered users a means to communicate ideas and suggestions for all to see.

Search

This will allow you to search WEB pages for a specific term or function. *This does NOT search the CMMS database.*

Feedback

This will allow you to send information directly to us.

Add User

This will allow you to create a new user to access CMMS.

CMMS Conceptual Models of the Mission Space

[Home](#)[Register](#)[Query](#)[View](#)[Reports](#)[Reference](#)[VV&A](#)[Support](#)

Model Registration

This area is used to create an entirely new model, update an existing Model, or update the data files for an exiting version (in the event the conversion or upload failed). Please choose an appropriate section and provide information that is requested.

Create a New Model

This will allow you to create an entirely new model. Choose this option only if you have spoken with a CMMS data manager and have an agreed upon Data File Interchange Format (DIF). You will be required to:

1. Enter a Model Name, Description, and DIF.
2. Enter the Version information.
3. Then upload the raw data file(s).

Update an Existing Model

This will allow you to create a new version of an existing mode. Choose this option if you have previously created a model and you would like to upload a new set of data files. You will be required to:

1. Select a Model to update.
2. Enter the Version information.
3. Then upload the raw data file(s).

CMMS Conceptual Models of the Mission Space

Upload Data Files

We are ready to receive the data files for your model. Please begin uploading a complete set of data files by following the simple steps below:

1. Click in the file transfer window below.
2. From Netscape, select "File", then "Upload File..." to send the file to our FTP site.
3. After uploading your file(s), **YOU MUST** click the button below to finalize the model registration process.

I have finished uploading files, begin converting data...

Air Tasking Order [*Air Tasking Order*]

Description: A method used to task and disseminate to components, subordinate units, and command and control agencies those projected sorties/capabilities/forces to targets and specific missions. Normally provides specific instructions to include call signs, targets, controlling agencies, etc..., as well as general instructions. (source: JP1-02) An ATO consists of : Part 1. Message header: ATO Number, for Part 2. Mission Data: Mission Number, Target BE Number, Probability of Destruction Desired (or best possible), Unit Name, Number and Type Aircraft, Weapons Number and Type per aircraft (or best available

Type: Information/Data

VV&A: Not Verified, 07-Oct-1996

Mission Planning Cell

Description: A group at wing level that conducts the feasibility studies of ATO directed missions and may also do detailed route, mission execution area tactics, and weapons selection activities. Normally led by a Mission Director and supported by weapons and tactics officers, intelligence specialists (weaponeers, targeters, threat experts), weather specialists, and aircrews.
